COMMISSION OF THE EUROPEAN COMMUNITIES

COM(76) 696 final

Brussels, 23 December 1976

DRAFT

COUNCIL REGULATION (EEC)

opening, allocating and administering a
Community tariff quota for ferro-chromium
containing not less than 4% by weight of
carbon, falling within subheading ex 73.02 E I
of the Common Customs Tariff, and extending
the benefit of this quota to certain imports
of ferro-chromium containing a quantity of
between 3 and 4% by weight of carbon (1977)

(submitted to the Council by the Commission)

COM(76) 696 final

1. In response to a request by the United Kingdom, Commission staff re-examined, at the meeting of the Economic Tariff Problems Group held on 18 November 1976, the problem of opening autonomous Community tariff quota for 1977 for certain grades of ferro-chromium falling within subheading ex 73.02 E I of the Common Customs Tariff. The request especially concerns :

(a) a type of ferro-chromium known as "charge chrome" containing not less than 6 % of carbon, which would have to be defined ;

(b) "high-carbon" ferro-chromium containing not less than 4 % (or 3 % up to a specified limit) of carbon.

2. Discussions showed, as in 1976, that :

- no definition of "charge chrome" based on the criteria of chromium, carbon and silicon contents could be established by consensus among the Member States ;
- overall Community requirements, calculated by the traditional method on the basis of the forecasts currently available, would fall between 150,000 and 200,000 tonnes for 1977 ;
- within the Community, and especially in one Member State, the production capacity for high-carbon ferro-chromium is not fully utilized ;
- the fact that the use of "charge chrome" in Community industries is of fairly recent date makes it impossible to estimate with sufficient accuracy the requirements of the Community or of each Member State for imports of this product from third countries ;
- the uncertainty which overshadows various sectors of the economy as a result of the world crisis, the uncertainty due to the absence of an acceptable definition of first-grade ferro-chromium and the existence of Community production make it impossible to be sufficiently accurate in regard to Community requirements for second-grade ferro-chromium.

It is for these reasons that the Commission proposes to adhere to the solution already adopted in previous years of opening a single tariff quota covering the two grades of ferro-chromium concerned and setting its volume at the same provisional level of 52,000 tonnes as in 1976, subject to review during the quota period as soon as more accurate forecasts are received. It is also proposed that within this quota the customs tariff duty be totally suspended.

3. In accordance with the practice usually adopted in cases of the kind, the proposed quota volume has been divided into two instalments, the first instalment being allocated among the Member States with the same shares in 1976 and the second constituting a Community reserve. The constitution of a reserve is all the more justified in the present case because the quota volume is open to revision during the year in order to bring it better into line with the actual needs of the user industries.

DRAFT
COUNCIL REGULATION (EEC)

opening, allocating and administering a Community tariff quota for ferro-chromium containing not less than 4 % by weight of carbon, falling within subheading ex 73.02 E I of the Common Customs Tariff, and extending the benefit of this quota to certain imports of ferro-chromium containing a quantity of between 3 and 4 % by weight of carbon (1977)

THE COUNCIL OF THE EUROPEAN
COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 28 thereof,

Having regard to the draft Regulation submitted by the Commission,

Whereas for ferro-chromium containing not less than 4 % by weight of carbon, Community production is, to a variable degree, inadequate and producers are unable to meet the total requirements of consumer industries in the Community; whereas it is therefore in the Community's interest to suspend totally in respect of this metal the application of the Common Customs Tariff duty until 31 December 1977, within a suitable tariff quota; whereas in order not to raise the question of the prospects for development of the Community production sector and taking into account the uncertainties which surround the different ferro-alloy consumption sectors, it is appropriate to fix the quota volume at the provisional level of 52 000 metric tons; whereas for the same reasons Member States should be free to authorize charges to be made against this volume only subject to the products being used for certain purposes; whereas the fixing of this amount, relating to prudent estimates, does not exclude future adjustment;

Whereas relatively limited imports of ferro-chromium containing a quantity of between 3 and 4 % by weight of carbon are foreseeable for this quota period; whereas provision should be made on a temporary basis for the extension of the benefit of the tariff quota in question to these imports, limiting it however to 20 % of the quota volume taking account of the existence of Community production;

Whereas equal and continuous access to the quota should be ensured for all Community importers and the rate of duty for the tariff quota should be applied consistently to all imports until the quota is exhausted; whereas in the light of these principles arrangements for the utilization of the tariff quota based on an allocation among Member States would seem to be consistent with the Community nature of the quota; whereas, to correspond as closely as possible to the actual trend in the market in the product in question, allocation of the quota should be in proportion to the requirements of the Member States as calculated by reference to statistics of imports from third countries during a representative reference period and to the economic outlook for the quota period in question;

Whereas, however, since the quota is an autonomous Community tariff quota intended to cover import needs arising in the Community, it may, as an experiment, be allocated on the basis of the temporary import needs from third countries expressed by each of the Member States; whereas this system of allocation also ensures the uniform application of the Common Customs Tariff;

Whereas, to take account of future import trends for the product concerned, the quota should be divided into two tranches, the first being allocated among the Member States and the second held as a reserve to cover subsequently the requirements of Member States which have exhausted their initial shares and any additional requirements which might arise in the other Member States; whereas, to give importers of the Member States some degree of certainty, the first tranche of the tariff quota should be fixed at a relatively high level which could be 47 000 metric tons;

Whereas Member States may exhaust their initial shares at different rates; whereas to avoid disruption of supplies on this account it should be provided that any Member State which has almost used up its initial share should draw an additional share from the reserve; whereas each time its additional share is almost exhausted a Member State should draw a further share, and so on as many times as the reserve allows; whereas the initial and additional shares should be valid until the end of the quota period; whereas this form of administration requires close collaboration between the Member States and the Commission and the Commission must be in a position to keep account of the extent to which the quotas have been used up and to inform the Member States accordingly;

Whereas if at a given date in the quota period a considerable quantity of a Member State's initial share remains unused it is essential that such State should return a significant proportion thereof to the reserve, in order to prevent a part of a quota from remaining unused in one Member State while it could be used in others;

Whereas, since the Kingdom of Belgium, the Kingdom of the Netherlands and the Grand Duchy of Luxembourg are united within and jointly represented by the Benelux Economic Union, any measure concerning the administration of the shares allocated to that Economic Union may be carried out by any one of its members,

HAS ADOPTED THIS REGULATION:

Article 1

1. From the date of entry into force of this Regulation and until 31 December 1977 a tariff quota of 52 000 metric tons shall be opened within the Community in respect of ferro-chromium containing not less than 4 % by weight of carbon falling within subheading ex 73.02 E I of the Common Customs Tariff.

2. During this period the Member States shall be authorized within the 20 % limit of the quotas allocated to them or which they levy on the reserve in accordance with Articles 2 and 3 to charge against the said tariff quota, imports of ferro-chromium containing a quantity of between 3 and 4 % by weight of carbon.

3. Importations of the products in question, which already benefit from exemption from customs duties under another preferential tariff system, are not to be charged against this tariff quota.

4. Within this quota, the customs tariff duty shall be totally suspended.

5. New Member States shall apply duties on imports within this quota calculated in accordance with the relevant provisions of the Act of Accession.

Article 2

1. A first instalment of 47 000 metric tons of this Community tariff quota shall be allocated among the Member States; the shares, which, subject to Article 5, shall be valid until 31 December 1977, shall be as follows:

Benelux	9 500 metric tons,
Denmark	84 metric tons,
Germany	12 714 metric tons,
France	7 624 metric tons,
Ireland	8 metric tons,
Italy	2 540 metric tons,
United Kingdom	14 530 metric tons.

2. The second instalment of 5 000 metric tons shall constitute the reserve.

Article 3

1. As soon as one of the Member States referred to in Article 2 has used 90 % or more of its initial share as fixed in Article 2 (1), or of that share minus any portion returned to the reserve pursuant to Article 5, it shall forthwith, by notifying the Commission, draw a second share, to the extent that the reserve so permits, equal to 10 % of its initial share rounded up as necessary to the next whole number.

2. As soon as one of the Member States, after exhausting its initial share, has used 90 % or more of the second share drawn by it, that Member State shall forthwith, in the manner and to the extent provided in paragraph 1, draw a third share equal to 5 % of its initial share.

3. As soon as one of the Member States, after exhausting its second share, has used 90 % or more of the third share drawn by it, that Member State shall forthwith and on the same conditions draw a fourth share equal to the third.

This process shall continue until the reserve is exhausted.

Notwithstanding paragraphs 1 to 3, Member State may draw shares lower than those specified in those paragraphs if there are grounds for believing that those specified may not be used in full. Any Member State applying this paragraph shall inform the Commission of its grounds for so doing.

Article 4

Additional shares drawn pursuant to Article 3 shall be valid until 31 December 1977.

Article 5

The Member States shall not later than 1 October 1977 return to the reserve the unused portion of their initial share which on 15 September 1977 exceeds 20 % of the initial amount. They may return a greater portion if there are grounds for believing that such portion may not be used in full.

Not later than 1 October 1977^{the} Member States shall notify the Commission of the total quantities of the products in question imported up to and including 15 September 1977 and charged against the Community quota and of any portion of their initial shares returned to the reserve.

Article 6

Member States may restrict the product in question which may be charged against their quota shares to products to be used for certain purposes.

Article 7

The Commission shall keep an account of the shares opened by the Member States pursuant to Articles 2 and 3 and shall, as soon as the information reaches it, inform each State of the extent to which the reserve has been used up.

Not later than 5 October 1977 it shall inform the Member States of the amounts still in reserve following any return of shares pursuant to Article 5.

It shall ensure that when an amount exhausting the reserve is drawn, the amount so drawn does not exceed the balance available, and to this end shall notify the amount of that balance to the Member State making the last drawing.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at

Article 8

1. The Member States shall take all appropriate measures to ensure that additional shares drawn pursuant to Article 3 are opened in such a way that importations may be charged without interruption against their accumulated share of the tariff quota.

2. The Member States shall ensure that importers of the product in question established in their territories have free access to the shares allocated to them.

3. The Member States shall charge imports of the product in question against their shares as and when the product is entered with the customs authorities for home use.

4. The extent to which the Member States have used up their shares shall be determined on the basis of the importations charged against their shares in accordance with paragraph 3.

Article 9

At the request of the Commission, the Member States shall inform it of imports charged against their shares.

Article 10

The Member States and the Commission shall cooperate closely to ensure that this Regulation is complied with.

Article 11

This Regulation shall enter into force on the seventh day following that of its publication in the *Official Journal of the European Communities*.

For the Council

The President
